

# **WHIRLPOOL MODEL WCN 9-1 CHEST FREEZER**

This chest freezer is in working order and was in use until March 2015. It is now surplus to requirements. It was used as a back-up and overflow store in our garage and has been defrosted and thoroughly cleaned ready for re-use. It comes with the original documentation, not, unfortunately, in pristine condition, but still usable and the green LED that lights up when the appliance is switched on has not worked for some time. This does not affect the operation of the freezer.

The freezer measures 96 cm wide, 88 cm high with the lid closed and 65 cm deep, not including the clearance at the rear for air circulation.

See the Whirlpool section in the Downloads at
