

V-FIT ROWING MACHINE

This V-Fit rowing machine is in good condition and has not been used a great deal. It has been in storage for quite some time and is offered for sale because the space is required for other items.

The rowing machine has an electronic sensor and an LCD monitor. The monitor does burst into life when connected but I have not been successful in making it register use of the machine. This does not detract from its purpose and the rowing machine itself is in working order.
