

JONES FAMILY CS SEWING MACHINE

This is a vintage, hand-operated sewing machine in its own case. Its serial number is 275035 and is on a small plaque on the base. It seems to be in good working order and is in good condition. The outer case has suffered a little wear and tear and there is no key to operate the catch to open the cover. This requires a tool with a small square shaft and, in lieu of this, can be achieved using a small screwdriver. The price reflects its age, rarity and condition.
